Old Mutual Investment Group (South Africa) (Pty) Limited is a licensed financial services provider. Unit trusts are generally medium to long term investments. Past performance is no indication of future growth. Shorter term fluctuations can occur as your investment moves in line with the markets. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Unit trusts can engage in borrowing and scrip lending. Fund valuations take place on a daily basis at approximately 15:00 on a forward pricing basis. The fund's TER reflects the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio.
