3.4 Unit trust / mutual fund sales	8	5.5 Exposure to monoline insurance companies	17
3.5 Funds under management	8	5.6 US Life exposure to other sectors affected by sub-prime worries	17
3.6 Net client cash flow	8	5.7 Further analysis	18 - 20
		6.0 <u>Asia Pacific</u>	21
		7.0 <u>Economic statistics</u>	22

1.1 Explanatory notes

- (1) US Life FUM excludes FUM being managed by USAM
- (2) Funds under management is on an end user basis therefore includes all inter-company funds being managed by USAM
- (3) UK single premiums excludes APE sales now reported under mutual funds
- (4) Balances are as reported by Nedbank
- (5) Balances are as reported by M&F
- (6) All percentages have been restated to exclude separate account assets - this change has resulted in an increase to all reported percentages of the portfolio
- (7) Gross premiums represents 100% of the businesses; OM owns 50% of Skandia:BSAM and 26% of KMOM

5.4 Exposure to sub-prime lending ⁽⁶⁾

- Approximately 22.3% of Old Mutual US Life's portfolio is exposed to mortgage backed securities
 - Residential US\$2,390m
 - Commercial US\$2,031m
- Sub-prime exposure of \$740m (3.7% of overall portfolio) as of 31 March, 2008 (\$763m/3.8% as of 31 December 2007; \$862m/4.3% as of 30 September 2007)
 - Exposures concentrated in the most highly rated tranches (86% is AAA, 99% is AA and higher, and 100% is A and higher), with concentration in first mortgages without rate-reset risk, and owner-occupied rather than investor properties
 - Collateral has good characteristics: very high concentration of first mortgages, all fixed rate (no reset risk), high concentration of owner-occupied rather than investor properties
 - Acceptable original credit support remains
- Market value at 87% of book value
 - 2006 - 2007 vintages: 77% AAA, 100% AA and higher; concentrated in refinance mortgages (rather than purchase mortgages)
- No significant credit concerns raised on Alt-A and prime mortgage-backed holdings
- Total residential and commercial mortgage-backed holdings of \$4.4bn (22.3%) as of 31 March, 2008, of which \$2.4bn (12.0%) is RMBS and \$2.0bn (10.2%) is CMBS

5.5 Exposure to monoline insurance companies ⁽⁶⁾

- Monoline exposure of \$550m (2.8% of overall portfolio) as of 31 March, 2008
 - \$482m (or 88% of the total exposure) is indirect (wrapped) exposure and has a 93% fair value to book value ratio
 - \$68m of which is direct (unsecured) exposure, with a 84% fair value to book value ratio
- Of the 12% that represents the direct exposure, most are being recapitalised, or have sufficient funds to go into run-off mode (if necessary)

5.6 US Life exposure to other sectors affected by sub-prime worries ⁽⁶⁾

- The investment portfolio's aggregate credit experience is slightly under expectations but still in line with long-term assumptions
- 3.7% of US Life's general account portfolio of \$20 billion has direct exposure to sub-prime debt. Approximately 2.8% of US Life's general account portfolio has exposure to monoline insurers. The business was not fully immune to the unfavourable credit conditions and recorded impairment provisions during the first quarter with two securities written down by \$21 million. These write-downs reflect market value deterioration and fundamental business changes linked to sub-prime. As market conditions develop, there may be additional write-downs during the second quarter including sub-prime and mortgage related securities in common with other US financial institutions.
- 0.8% of the portfolio is in CDO's and credit default swaps, of which 99% is exposure to corporate credit and 1% is exposed to mortgage related securities
- 2.2% of the portfolio is unsecured bonds issued by mortgage lenders with sub-prime businesses. In all cases, sub-prime lending is a small part of their overall business
- 3.1% of the portfolio is in high yield corporate bonds. 79% of these holdings have a BB rating from either Moody's or S&P
- 1.1% of the portfolio is in hedge funds. None of these holdings have material exposures to sub-prime loans
- Whilst the business will experience mark-to-market losses on some holdings, it is well-matched to its liabilities and is fully able to hold the investments through to maturity
